Driving Digital Innovation for a Circular and Competitive European Industry

We are pleased to invite you to the Final Event of the ReSoURCE Project — Refractory Sorting Using Revolutionizing Classification Equipment, which will take place on November 17, 2025, in Brussels.

Location: AT60 “House of Austria”, Avenue de Cortenbergh 60, 1000 Brussels

Date: Monday, November 17, 2025

Time: 14:00 — 17:00 | Final Workshop

Networking & Aperitivo | 17:00 — 19:00

About the event

After four years of pioneering innovation, the ReSoURCE project is proud to showcase its outcomes, insights, and future perspectives. Funded by the EU Horizon programme and led by RHI Magnesita, ReSoURCE has developed cutting-edge solutions for automated refractory sorting, leveraging AI-powered multi-sensor technology, laser and hyperspectral imaging, and mobile sorting units.

These innovations strengthen the circular economy, reduce environmental impact, and support a more sustainable industry. By enabling automation and digitalisation, ReSoURCE contributes to the competitiveness of European industry and aligns with the ambitions of the Green Industrial Plan.

What to Expect

The event will feature:

- Insights into project achievements: Learn how ReSoURCE is transforming the refractory recycling value chain.
- Interactive discussions: Engage in expert-led sessions on the future of sustainable industrial practices and technological scaling.
- Case studies and success stories: Hear how new methods have been applied across industry settings.
- Forward-looking dialogue: Explore opportunities for adoption beyond refractories applications.
- Networking opportunities: Connect with peers and innovators
